MUSICIAN'S PRAYER

Oh Lord, please bless this music
that it might glorify Your name.

May the talent that You have bestowed upon me
be used only to serve You.

Let this music be a witness to Your majesty and love,
and remind us that You are always
watching, and listening from Your throne above.

May Your presence and beauty be found in every note,
and may the words that are sung
reach the hearts of Your people
so they will draw closer to You.

May Your Spirit guide us through every measure
so that we might be instruments of Your peace,
and proclaim Your glory with glad voices.

PHONETICS

Among the first publishers to use the system of *phonetics* was Shawnee Press. The purpose of using this other language was for the unification of the pronunciation of all words in the text of a choral work. Rather than reading words they knew, most of them very familiar, choir members were reading sounds; a new language that made for more unification of sound, thus, a much better blend of voices. These new sounds aim primarily at the most neutral pronunciation of the vowels in our American/English language. The goal is to pronounce each of these vowels accurately enough that the blend of voices is in complete agreement.

AH ----- \overline{OO} ----- AW ----- EH ----- EE ----- OH

DA ME NI PO TU LA BE

(pronounced)

DAH MEH NEE POH \overline{TOO} LAH BEH

He hath put a new song in my mouth, even praise unto our God:
many shall see it, and fear, and shall trust in the LORD.

Psalm 40:3

VOWEL SOUNDS

Below is a test example. Concentrate on the capitalized vowels. They are the “primary” vowel sounds that are held longest. All other sounds are minimized as much as possible, such as lower case vowel sounds within parentheses. These should be sung as short/quickly as possible. Likewise, all consonants should be minimized, though clearly pronounced. Consonants which are *voiced* should maintain the correct pitch. (There will be some discussion about which consonants are voiced, and those that are articulated only on the breath.) Continue on one breath until the break (//).

AH-----(oo)AW-----(t)OO-----(d)EH-----(oo)EH-----(r)EE-----(z)AH-----
(oo)AW-----(t) //

(h)EH-----(r)AW-----(l)AH-----(l)OH-----(h)EE-----(r)EH-----(d)OO-----

with some combination sounds between the primary vowels

AH-----(ee-oo)AW-----(k-t)OO-----(d)EH-----(ee-h-oo)EH-----
(r-j)EE-----(z)AH-----(z-oo)AW-----(k-t) // (h-oo)EH-----(r)AW-----
(l)AH-----(l)OH-----(n-h)EE-----(p-r)EH-----(ee-d)

DIPHTHONG

Diphthong: a vowel sound made up of two vowel sounds pronounced in one syllable, such as “ou” in *house*, or “oi” in *noise*. Also, it is often represented by only one letter, as “i” in *ice* or “u” in *abuse*.

Sing unto the LORD, O ye saints of his, and give thanks at the remembrance of his holiness.
